

Discontinuation of TrackView Pro SMS module

Due to ongoing issues with the module, we have made the decision to discontinue this.

For customers who wish to receive SMS notifications through our EMSuite platform, we now recommend utilizing the cloud service by enabling this in EMSuite.

For customers who prefer not to connect to cloud services, we suggest using the EMSuite Mobile App as an alternative method for receiving alerts.

If you have any questions or need assistance with setup, please do not hesitate to contact us.
