New!!! Two TVP DP Smart USB Sensors

From: Jason Daoust

May 2026

We are pleased to introduce two new TVP DP Smart USB sensors. These models offer the same differential pressure measurement ranges as our existing TVP DP Smart Sensors ($\pm 100\text{Pa}$ and $\pm 1250\text{Pa}$).

The updates are focused on the form factor:

- They now feature industry-standard barb fittings commonly used in pneumatic tubing systems. The tubing requirements remain unchanged at 6mm OD / 4mm ID.
- The redesign form factor enables the use of two DP sensors on a single transmitter.

Key Highlights

- ✓ Supports the use of two DP sensors on a single transmitter
- ✓ Equipped with industry-standard barb fittings
- ✓ Available in two differential pressure range options

Availability & How to Order

Name	Purchase	Lease	Rental
TVP DP Smart USB Sensor. $\pm 100\text{PA}$, 2 x Barb fittings for 6mmOD/4mmID pneumatic tube	33063751	33063751L	33063751R
TVP DP Smart USB Sensor. $\pm 1250\text{PA}$, 2 x Barb fittings for 6mmOD/4mmID pneumatic tube	33063713	33063713L	33063713R
