Reference: Notion Lite End of Life Status Update

To Whom It May Concern

Ellab had in September 2023 communicated the end-of-life of the Notion Lite range of products. Our intent was to be able to support our customers with hardware until Dec 2024. However, due to demand after the 1st notification we are having stock depletion. Therefore, we are not always able to provide additional hardware to our distributors or their customers.

Ellab's commitment to the Notion Lite product range will continue as we will support the software platform for the Notion Lite until end April 2025. It should be noted that there will be no software improvements of any kind during the current lifespan of the software platform.

Ellab continues to serve their customers currently with 2 solutions for Continuous Environmental Monitoring. These are the TrackView™ Pro and EMSuite™ and the IceSpy and EMS product families. As technology has progressed and newer products developed by Ellab, the Notion Lite range of products has been and/or will be phased out gradually.

We appreciate that customers have had concerns with the end-of-life of the Notion Lite range. However, Ellab is certain that customer needs are better served with the new TrackView Pro or the IceSpy range to meet the changing and more stringent continuous monitoring requirements and standards.

Ellab expresses gratitude to their customers and look forward to collaborating with them in the future.

Sincerely,
Ellab A/S, Denmark
