

## Specification Change on TrackView Pro Sensor

Due to material and production changes, the design of TVP Temperature Sensor has been updated.

As part of this update, the moulding compound used in the sensor assembly has a maximum temperature limit of +200°C. Consequently, the temperature specification for this item has been revised from +250°C to +200°C.

Affected item numbers are:

Item No.	TVP PT1000 Smart USB Sensor Sensor tip: 70 mm x 4 mm. wire: 4mm.
